Mr. Willie Walker-Headmaster
Dr. Grace Brown-Principal

5013 Gary Avenue
Fairfield, Alabama 35064

About Mr. Math

When Willie Walker left his successful job in accounting in 1983 he became a school teacher on a mission. It is his mission that is slowly changing the way children throughout the United States learn math.

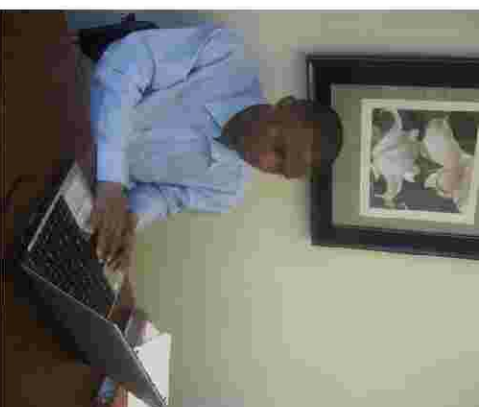

Walker is the President and founder of Project Motivational Math (PMM). The Florida based program relocated to Alabama in 2004. He and his group of instructors and tutors travel from school to school, teaching and motivating children to learn mathematics in ways they have never learned before-and it is working!

By incorporating memorization techniques from a business stand point into the minds of classroom children, Walker's group creates a learning environment for mathematics that is both fun and enjoyable for students of all ages. "Even children who don't necessarily enjoy math are learning to have fun computing math mentally", he says.

In addition to Walker's visits to the schools he is the Director of Project MAARK Learning Center in Fairfield, Alabama and he is the Headmaster of the program's new virtual math magnet academy for grades 7-12.

Virtual School &
Math Magnet Academy

GRADES
7-12

*About Our Virtual Academy
&
Math Magnet School*

Project Motivational Math Inc. (PMM) Virtual Academy & Math Magnet School opens in August 2008. Students in grades 7-12 will get their lessons and complete assignments on-line and by mail or they will have the option of attending school at our on-site location in Fairfield, Alabama. Those who choose to attend the Virtual PMM will communicate with their teachers and each other through the PMM website, email, telephone and/or facsimile.

The most important feature of this virtual school is the motivation factor. PMM is dedicated to keeping students motivated through-out the school year with opportunities to participate in on-line mental math competitions, Bible Bowl tournaments, Math & Science challenges, and Community Service projects. Students will be eligible for prizes, honors & awards as well as chances to be featured in the school's newsletter and on the website monthly.

OPTION A: Home School Setting

Students are taught in a home school environment taking most of their courses on-site at the Learning Center located in Fairfield, Alabama. No more than 2 classes are taught on-line. Tutoring in math and reading is available.

OPTION B: Virtual Academy

Students are taught in an web environment taking all of their courses via internet and sending in their submissions by mail. The classroom is the Project Motivational Math website. Students receive instruction, tutoring and classroom interaction via multimedia, podcasts and blogging.

One of the major assets to the PMM Virtual Program is that it is a math magnet school specifically focusing on building mathematical excellence. Students will have an opportunity to use world applications in mathematics. Career options are explored.

PMM is a strong curriculum enhancement tool that serves to reinforce and build upon methods and techniques previously learned in a traditional classroom setting while taking the student to the next level of creative problem solving and developing critical thinking skills. PMM also offers courses in Science, Bible, English, Literature, History, Foreign Language, Technology and Electives.

PMM ran a pilot program for the 2007-2008 school year at the Learning Center located in Fairfield, Alabama. There were eleven students in grades 9-12. Students took four classes in-house, two classes on-line and one class via submissions. Five seniors are graduating in June 2008.

Students receive their diplomas from Griggs International Academy located in Maryland. 20 hours of Community Service must also be completed before graduation. Griggs Academy is S.A.C.S. accredited.

Special points of interest:

- ⊗ Open Enrollment is now going on for the 2008-09 school year
- ⊗ Registration is \$ 300.00
- ⊗ Tuition for 2008-2009 School Year is \$ 325.00 for 10 months or \$ 3,250.00 (one time fee)
- ⊗ Those who pay the whole tuition fee of \$ 3,250.00 at the beginning of the school year are eligible for a 10% Discount
